“Our aim is for each product to possess qualities that transcend the prosaic features of material, form and performance. We can then create a continually evolving appreciation for the product as it naturally engages with each individual, thus extending its lifespan.” Thomas Coward – Omvivo Principal Designer.

Chiaro clear glass

### Basins

Unique design and beautiful, superior quality materials combine to produce the exclusive Omvivo basin collection. To eliminate water waste and for best performance an outlet using 5 – 7 litres per minute is recommended for all Omvivo basins. Individual basins may require further specific attributes for the outlet or faucet, please refer to the drawings and below information for details. All Omvivo basins are supplied with a polished chrome 'pop up plug and waste' and the KL is supplied with a waste and unique stainless steel grate.

#### KL

The KL basin in natural stone is a bench mounted basin designed to have wall mounted tap-ware, while the solid surface KL is also available wall mounted and with 1 tap hole. A 250 mm wall outlet is recommended, with the water falling at a 90 degree angle directly down onto the vessel.

#### Pond™

The Pond™ basin, available in solid surface and a range of natural stones is supplied with a polished chrome spacer.

#### Aqua

The Aqua basin, available in a range of glass finishes is supplied with a polished chrome spacer.

#### Motif

The Motif basin, available in three patterns is created from solid surface and glass. Each Motif basin begins with the piece of beautiful hand-etched glass which is formed in a kiln creating fall to the waste, then fitted with the solid surface surround. Motif basins are supplied with a polished chrome spacer.

#### Dune

Created from solid surface, Dune has a unique, elegant flowing form and is supplied with arms for wall mounting. The arms, created from stainless steel are designed to attach to studs or supports in a 90 mm cavity wall. A 150 mm wall outlet is recommended, with the water falling at a 90 degree angle directly down onto the vessel.

#### Cubo and Cubolong

The bench mounted Cubo and Cubolong basins are available in a range of natural stones.

#### Mono

The Mono basin, available in solid surface and a range of natural stones can be bench mounted or partnered with the elegant complimentary pedestal.

#### Lilli

The Lilli basin, available in solid surface and Softskin options, is a wall mounted basin that can also be installed onto a bench top. Lilli can be supplied with or without a tap hole, and the Lilli 550 basin has an overflow.

#### Softskin

Softskin is a durable finish applied to solid surface that provides a unique two tone effect available in four colours. Suitable for the KL, Lilli and Mono basin and pedestal, Softskin is a contemporary and playful way of customising your Omvivo basin.

### Furniture

The Omvivo cabinets are designed specifically to compliment the Omvivo basins. A range of finishes and designs are available, providing stylish and practical storage solutions for a variety of bathroom environments.

#### KL and Vessel cabinets

The wall mounted KL and Vessel cabinets have smooth 'soft close' drawers, the KL cabinet has a convenient internal cosmetic drawer. The Vessel cabinet suits the Pond™ and Aqua basins, while the KL cabinet is specifically designed for the KL basin.

#### Vessel shelf

The optional Vessel shelf is positioned between the basin and cabinet to provide additional surface area and to visually complete the design. It is an excellent way of customising the appearance of the furniture while adding practical bench space.

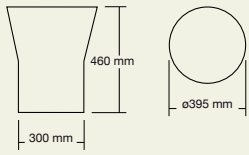

#### Motif vanity

The Motif vanity has a discreet partitioned drawer and is supplied with two hand turned solid timber legs, all painted white. The vanity is finished with a solid surface offset bench top. The Motif vanity is designed to complement the Motif basins, and will also suit many other styles of basin.
