CDesign

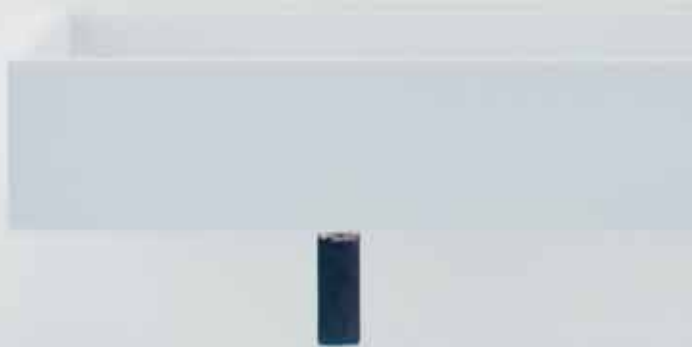

CDesign has been created in partnership with leading design firm Carr Design Group with the intention to produce a distinct, contemporary and functional range of bathroom products.

The quest for simplicity in detail has had a significant influence in framing my approach to this range... Conceiving the collection, my focus was to design useful objects representing uncomplicated, timeless forms.

The uncomplicated aesthetics of the CDesign collection represent a rigorously simple geometric form, flexible design and Carr's signature understated detailing. Fused together, these elements generate a complete suite of products ideal for a diverse array of both residential and commercial environments.

Product

CDesign 620 and 1330 basins

The Italian made CDesign basins can be installed with left or right hand bowls and can be bench or wall mounted with wall or hob mounted taps. For ultimate flexibility the CDesign basins are supplied without tap or fixings holes, these are to be drilled by the installer. Each basin is supplied with a polished chrome pop up plug and waste.

CDesign cabinets

The CDesign cabinets are made in Australia and are designed specifically to partner the CDesign basins. The wall mounted cabinets have smooth soft close mechanisms.

Finishes

Solid surface

Solid surface products have a wonderful smooth surface that is extremely hard wearing, durable and easy to maintain, ideal for residential and commercial applications. These solid surface basins are non porous, scratches and stains can be cleaned or buffed out and in most cases they are even repairable.

Powder coat

Timber powder coat is an effective, durable finish that matches the colour and matte surface of the basins beautifully. It completely encapsulates each panel so the appearance is consistent inside and out.

Softskin

Softskin is a durable finish that provides a unique two tone effect available in four colours. With its soft tactile surface, Softskin is a contemporary and playful way of introducing colour into the bathroom.
